What is ArcGIS?

ArcGIS is a family of software products that form a complete GIS built on industry standards that provide exceptional, yet easy to use, capabilities right out of the box. ArcGIS is a complete, single, integrated system for geographic data creation, management, integration, and analysis. Much more than a specialized offering for a small niche of specialists, ArcGIS is designed as a scalable system that can be deployed in every organization, from an individual desktop to a globally distributed network of people.

www.esri.com

Audience:

For people wanting to be introduced to the Geoprocessing environment of ArcGIS. New and existing data managers interested in migrating to the Geodatabase environment can benefit from taking this course

In this two day course, students will be introduced to the Geoprocessing environment in ArcGIS. Regional data will be used for the course. Participants learn how to create, share, and modify models for analysis. Management of raster data, XML Import/Export, image catalogs, the command line interface to the software and python scripting is introduced. This course is for spatial data managers and analysts who have an understanding of the ArcGIS desktop applications and are ready to make use of the Geoprocessing environment for ArcGIS. New and existing data managers interested in migrating to the Geodatabase environment can benefit from taking this course.

Prerequisites:

Introduction to ArcGIS II or equivalent knowledge

Our ArcGIS Courses are taught by a Certified ESRI Trainer!

One of the Best in the Industry!

Ethical Hacking and Countermeasures

From *denial-of-service* and *Web page defacements* to *information theft* that *can COST* your company millions of dollars, the motive of the attacker may vary but the solution is the same. The premise of the course is simple: *your need to understand today's security threats*, you need to know how hackers identify and exploit your organization's vulnerabilities, and you need to know what you can do to eliminate those vulnerabilities. You will learn what you should do and what the hacker is doing before, during and after the hack. As each exploit technique is taught, you will perform the task individually and then you will implement and test an appropriate countermeasure.

Class Date: June 26, July 10, 17, 24, 31

List Price: \$ 2,495.00

Discount Price: \$ 1,995.00

Computer Hacking Forensic Investigator

Computer hacking forensic investigation is the process of detecting hacking attacks and properly extracting evidence to report the crime and conduct audits to prevent future attacks. Computer forensics is simply the application of computer investigation and analysis techniques in the interests of determining potential legal evidence. Evidence might be sought in a wide range of computer crime or misuse, including but not limited to theft of trade secrets, theft of or destruction of intellectual property, and fraud. The CHFI course will provide participants the necessary skills to identify an intruder's footprints and to properly gather the necessary evidence to prosecute in the court of law.

Class Date: August 14, 21, 28, 9/11 and 18

List Price: \$ 2,495.00

Discount Price: \$ 1,995.00

EC: Certified Security Analyst

The ECSA program is a highly interactive five day security class designed to teach Security Professionals the advanced uses of the available methodologies, tools and techniques required to perform comprehensive information security tests. Students will learn how to design, secure and test networks to protect your organization from the threats hackers and crackers pose. By teaching the methodology and ground breaking techniques for security and penetration testing, this class will help you perform the intensive assessments required to effectively identify and mitigate risks to the security of your infrastructure. As students learn to identify security problems, they also learn how to avoid and eliminate them.

Class Date: July 13 - 17

List Price: \$ 2,495.00

Discount Price: \$ 1,995.00

Professional MBA Program - Dublin Cohort

Ohio University - Professional MBA Program to Start Fall of 2009 at The Computer Workshop!
Ohio University and The Computer Workshop, Inc., have teamed up to offer Professional MBA Program classes at The Computer Workshop facility in Dublin, Ohio. The Professional MBA is a part-time M.B.A. program designed to meet the educational needs and career objectives of working professionals. This unique program blends traditional classroom instruction with video conferencing and interactive television technology supported by the use of an Internet-mediated instructional component, all balanced by a series of residencies. We invite you to attend an information session at The Computer Workshop, Inc. conducted by PMBA Program Director Dr. Edward Yost.
